

Sheet Metal Worker Instructor Needed

The Ontario Sheet Metal Workers Training Centre is looking for a new instructor. With the increase of demand in the sheet metal industry we would like to provide the highest quality of instruction for the future of our trade.

We are looking for an individual that is self-motivated, knowledgeable and experienced.

Experience

- 5 to 10 years in the 308A sheet metal trade
- Welding background is an asset
- Teaching experience is an asset
- Knowledge of layout, shop fabrication, field installation, mathematics, sheet metal theory, welding theory, siding and decking and testing and balancing.
- Comfortable working with power point, word and excel
- Estimating or supervisory role is an asset

Responsibilities

- Delivering course curriculum in classroom and shop settings
- Tutoring and academic counseling of apprentices while evaluating progress and achievements
- Overall grading and assessments of apprentices within assigned courses
- Developing individualized instruction and multimedia presentations into the learning process where applicable
- Incorporating technology into lesson planning
- Attending periodic upgrading courses
- General duties around the building
- Helping with various sheet metal competitions at the provincial and national level

We would like all resumes to be sent in by Sep 12th, 2025
